

Ricardo Jorge

AI Product Engineer

Lisbon, Portugal

Frontend systems, data-rich products, and agent workflows for startups that need senior hands-on delivery.

ricardojorgexyz@gmail.com rj11.io github.com/rj11io linkedin.com/in/rj11io

PROFILE

Professional history spans 2015-2026, with React work since 2016 and Next.js work since 2018. Most engagements started with standing up the frontend foundation: architecture, component systems, tooling, CI/CD, and the habits that let a product team ship reliably.

The strongest through-line is data-heavy product engineering. Recent work centers on AI product surfaces, cybersecurity dashboards, proprietary data explorers, and the kinds of visual interfaces that help complex systems feel legible to end users.

2016

building production React applications

2018

shipping in Next.js

AI + data

current concentration across product work

FOCUS

AI product delivery

Hands-on work across PDF extraction, SEO analytics, GenAI portals, AI chats, custom GPT experiences, skills, and automations.

Data interface craft

Dashboards, proprietary data explorers, and custom visualisation components shaped for cybersecurity, crypto, gaming, and B2B products.

Frontend systems

TypeScript-first application architecture, design systems, Storybook, test automation, and release pipelines built for real teams, not demos.

Team enablement

Repeatedly responsible for interviewing, onboarding, playbooks, developer experience, and the operational standards that let new engineers ramp fast.

SELECTED WORK

AI Product Engineer

rj11io B2B | Remote

MAR 2025 - PRESENT

- Build AI product surfaces for early-stage startups, from PDF extraction and SEO analytics to a GenAI dermatopathology portal and custom GPT experiences.
- Deliver cybersecurity dashboards, proprietary data explorers, AI chats, and other data-heavy interfaces from the ground up.
- Design agent harnesses, custom skills, and n8n automations while operating as a hands-on independent product engineer.

Product / Datavis Engineer

Hunt Intelligence, Inc. B2B | Remote

APR 2024 - MAR 2025

- Focused on data visualisation for a threat-intelligence product, including custom components such as the IP History Widget.
- Built core modules including AttackCapture and HuntSQL in a modern TypeScript stack with Next.js, shadcn/ui, Playwright, Vercel, and GitHub Actions.
- Shipped an OpenAPI-based documentation experience that was richer and easier to navigate than the previous Swagger output.

CAREER RECORD

Frontend Lead

FEB 2020 - OCT 2021

BinaryEdge / Coalition, Inc. Remote

- Started as the solo frontend engineer and grew into frontend lead for customer-facing security apps and internal tools.
- Introduced React, TypeScript, Next.js, Material-UI, Nivo, and micro frontends across BinaryEdge and Coalition product surfaces.
- Led Attack Surface Monitoring, Coalition Explorer, the customer-security component library, and CI/CD improvements as the frontend practice scaled up.

OPEN SOURCE

11io

2025 - PRESENT

www.rj11.io/

Personal brand and B2B freelance presence.

11ai

2026 - PRESENT

ai.rj11.io/

Open-source AI skills, plugins, and workflows.

11bench

2026 - PRESENT

bench.rj11.io/

Open-source AI benchmarks.

CAPABILITIES

Product engineering

TypeScript | React | Next.js | AI SDK | Convex | Playwright | Vercel

AI and automation

Agent automations | Custom agent skills | Harness engineering | Codex | Claude Code | n8n

UI and data

Tailwind CSS | shadcn/ui | Design systems | Storybook | Dashboards | d3 | Recharts | Nivo

Leadership

Hiring | Interviewing | Onboarding | Project management | Product design | Agile methodologies

EARLIER ROLES

Fullstack Engineer, Co-Founder, Glaiveware

MAR 2018 - DEC 2019

Built bespoke web applications with React, Next.js, Node.js, AWS, and a wider project-delivery remit that included design, SEO/SEM, and client management.

React Native Developer, Sycret.ink

JAN 2017 - DEC 2017

Developed a serverless React Native chat app with end-to-end encryption under contract with a three-person team.

Full Stack JavaScript Developer, American Heart Association

SEP 2016 - NOV 2016

Built an admin dashboard in React and Node for the AHA's Kinect integration through a university scholarship.

Frontend Developer, NextBitt

OCT 2015 - JUL 2016

Built analytics dashboards plus reporting, auditing, and management tools for asset and facilities software.

Java Developer, Science4you

JAN 2015 - MAR 2015

Internship focused on a Java and MySQL back-office management system for orders, reports, and automated emails.
