

Ricardo Jorge

AI Product Engineer

PROFILE

AI Product Engineer with a decade of professional TypeScript experience, building with React since 2016 and Next.js since 2018. Often the first frontend hire, owning architecture, tooling, component libraries, delivery pipelines, and the hiring/onboarding playbooks that let teams scale.

Specializes in data-heavy product platforms for cybersecurity, crypto, gaming, and early-stage AI products: dashboards, proprietary data explorers, API documentation, AI extraction workflows, custom GPT experiences, and agent harnesses.

FOCUS	Product-grade AI interfaces and agent workflows	Frontend architecture for data-rich B2B products
	Design systems, dashboards, and visualization	Technical leadership from zero-to-one through team scale

Started by modding and reverse-engineering games and consoles, building a MUGEN fighting game, running dedicated servers, and placing second nationally with a LEGO Mindstorms team that reached the final four of the 2008 robotics world cup in China.

SKILLS	Core stack	TypeScript · React.js · Next.js · AI SDK · Convex · Playwright · Vercel
	AI engineering	Agent automations · Custom agent skills · Harness engineering · Codex · Claude Code · n8n
	UI and data	Tailwind CSS · shadcn/ui · Material-UI · Design systems · Storybook · Dashboards · Data visualization · d3 · Recharts · Nivo
	Delivery	Team leadership · Project management · End-to-end product engineering · Product design · Agile methodologies

PROJECTS

11io rj11.io · 2025 - Present · Personal brand for B2B freelancing.

11ai ai.rj11.io · 2026 - Present · Open source AI skills, plugins, and workflows.

11bench bench.rj11.io · 2026 - Present · Open source AI benchmarks.

EXPERIENCE	AI Product Engineer	Mar 2025 - Present
	rj11.io · B2B, Remote	
	Build early-stage AI products from the ground up across multiple startup teams, covering product shape, frontend architecture, workflows, and delivery.	
	Shipped AI PDF extraction, AI SEO analytics, a GenAI dermatopathology portal, real estate platform work, AI chats, and custom GPT experiences.	
	Built cybersecurity dashboards, proprietary data explorers, smart scraping agents, n8n workflows, AI agent harnesses, custom skills, and automations.	
	Product / Datavis Engineer	Apr 2024 - Mar 2025
	Hunt Intelligence, Inc. · B2B, Remote	
	Focused on data visualization for a threat-intelligence product, including custom components such as the IP History Widget.	
	Built core modules including AttackCapture and HuntSQL on a modern TypeScript stack with Next.js, shadcn/ui, Playwright, Vercel, and GitHub Actions.	
	Created an OpenAPI-based documentation platform that enriched the raw specification with metadata and shipped a clearer product documentation UI.	
	Senior Frontend Engineer to Team Lead	Jun 2023 - Apr 2024
	OMEGA Systems · Remote	
	Built the next generation of OMEGA's iGaming platform management system, CORE5, with TypeScript and React, then moved into frontend team leadership.	
	Delivered data visualization for main and social dashboards, reporting, configuration views, localization, and an internal tab-system UI.	
	Established developer onboarding, ticket and documentation standards, remote/asynchronous workflow practices, and Definition of Done expectations.	

EXPERIENCE	Senior Frontend Engineer Jan 2022 - May 2023 Phantasma Chain · Remote Built the frontend monorepo for new tools and apps, designed and developed Phantasma UI Storybook, and built Phantasma Explorer. Set up Playwright testing, GitHub Actions CI, Vercel delivery, environment configuration, localization, white-label theming, and custom app tooling. Contributed improvements to the Phantasma TypeScript SDK and built in-house React hooks and API/scripts modules around it.
	Frontend Lead Feb 2020 - Oct 2021 BinaryEdge / Coalition, Inc. · Remote Started as the solo frontend engineer and grew a customer-security team building customer-facing security apps and internal platforms. Introduced React, TypeScript, Material-UI, Nivo, Next.js, and micro frontends; led Coalition Explorer, Coalition Storybook, component libraries, and visualizations. Built Attack Surface Monitoring on the BinaryEdge Portal, later integrated into Coalition Explorer and Coalition Control, and migrated frontend CI/CD from Drone to GitHub Actions.
EARLIER SELECTED WORK	Fullstack Engineer and Co-Founder at Glaiveware, building bespoke web apps and learning project/business management (Mar 2018 - Dec 2019). React Native Developer at Sycret.ink on an end-to-end encrypted mobile chat app with a serverless environment (Jan 2017 - Dec 2017). Full Stack JavaScript Developer for the American Heart Association, building a React/Node admin dashboard for a Kinect integration (Sep 2016 - Nov 2016). Frontend Developer at NextBitt, creating analytics dashboards and asset/facilities-management tooling (Oct 2015 - Jul 2016).
EDUCATION	IT Systems Management and Programming 2013 - 2016 Escola Profissional de Tecnologia Digital · Lisbon, Portugal Técnico de Gestão e Programação de Sistemas Informáticos
PUBLIC CODE	Modern GitHub github.com/rj11io · 2023 - Present · Open source code for current AI and product projects.
