## ABOUT

AI Product Engineer with a decade of professional TypeScript experience, building on React since 2016 and Next.js since 2018. On most projects I was the first frontend hire, owning architecture, tooling, component libraries, and pipelines from day one, then growing the team around them through hiring, interviewing, onboarding, and playbooks.

Most of my experience is building dashboards, product platforms, and proprietary data explorers for cybersecurity, crypto, and gaming companies. I have also worked with AI since the first releases of Copilot and ChatGPT, moving from prompt and context engineering to open-source skills, agent harnesses, and automations.

---

## SKILLS

### Core stack

TypeScript · React · Next.js · AI SDK · Convex · Playwright · Vercel

### AI engineering

Agent automations · Custom agent skills · Harness engineering · Codex · Claude Code · n8n

### UI and data

Tailwind CSS · shadcn/ui · Design systems · Storybook · Dashboards · Data visualisation

### Leadership and delivery

Team and project management · End-to-end product engineering · Product design · Agile methodologies

---

## SELECTED WORK

**11io** rj11.io Personal brand for B2B freelancing.

**11ai** ai.rj11.io Open source AI skills, plugins, and workflows.

**11bench** bench.rj11.io Open source AI benchmarks.

---

## EXPERIENCE

### AI Product Engineer

Mar 2025 - Present

rj11io · Remote

Hands-on AI product engineering for multiple early-stage startups, building projects from the ground up.

Delivered AI data extraction from PDFs, AI SEO analytics, a GenAI dermatopathology portal, AI chats, custom GPT experiences, and real-estate and cybersecurity products.

Built AI agent harnesses, skills, and automations, including smart-scraping workflows and personal-project maintenance agents.

### Product / Datavis Engineer

Apr 2024 - Mar 2025

Hunt Intelligence, Inc. · Remote

Focused on threat-intelligence visualisation, including custom components such as the IP History Widget.

Built AttackCapture and HuntSQL on a modern TypeScript codebase with the latest Next.js, shadcn/ui, Playwright, GitHub Actions, and Vercel.

Shipped a friendlier API documentation site on top of OpenAPI, aimed to be clearer than Swagger.

## EXPERIENCE

### Senior Frontend Engineer -> Team Lead

Jun 2023 - Apr 2024

OMEGA Systems · Remote

Built CORE5, the next generation of OMEGA's iGaming platform management system, with TypeScript and React.

Owned data visualisation for the Main and Social dashboards, plus report and configuration views.

As lead, shaped developer onboarding, ticket standards, documentation, and remote and async workflows.

### Senior Frontend Engineer

Jan 2022 - May 2023

Phantasma Chain · Remote

Built the frontend monorepo for new tools and apps, plus the Phantasma UI Storybook and Phantasma Explorer.

Set up Playwright testing, GitHub Actions CI, and Vercel CD, and contributed improvements to the Phantasma TypeScript SDK.

Added in-house utilities for localisation, white-label theming, environment config, and API/scripts/hooks orchestration.

### Frontend Lead

Feb 2020 - Oct 2021

BinaryEdge / Coalition, Inc. · Remote

Started as the solo frontend engineer and grew a team around customer-facing security apps and internal tools.

Introduced React, TypeScript, Next.js, Material-UI, Nivo, and micro frontends; led Coalition Explorer, the component library, and data visualisations.

Built Attack Surface Monitoring for the BinaryEdge Portal and later integrated it into Coalition Explorer and Coalition Control.

### Earlier roles

Glaiveware, Sycret.ink, American Heart Association, NextBitt, Science4you · Lisbon, Portugal and Remote

2015 - 2019

Co-founder at Glaiveware building bespoke web apps; React Native chat app with end-to-end encryption at Sycret.ink; full-stack dashboard work for the American Heart Association; analytics dashboards at NextBitt; Java and MySQL internship work at Science4you.

---

## EDUCATION

### IT Systems Management and Programming

Escola Profissional de Tecnologia Digital · 2013 - 2016
